Gherkins Product Specifications

01

Size Grade 0–3 cm (300+)

Extra small gherkins, perfect for garnish and specialty applications. Premium quality with consistent sizing.

02

Size Grade 1–4 cm (150/300)

Small gherkins ideal for food service and retail packaging. Excellent crunch and flavour profile.

03

Size Grade 3–6 cm (60/160)

Medium gherkins, our most popular size for international markets. Balanced texture and appearance.

04

Size Grade 6–9 cm (20/60)

Large gherkins suitable for slicing and processing. Maintained firmness with superior taste. Available in acidified as well as in Salt Brine media.

05

Size Grade 9–12 cm (5 - 20)

Extra large gherkins for industrial processing. Consistent quality meeting international specifications. Available in acidified as well as in Salt Brine media.

All sizes: Packed in 15L HDPE Pails with 10kg net drained weight or packed 190kgs in 260L HDPE Barrels

Processing & Quality Control:

Our okra is harvested at peak freshness and immediately transported to our facilities. Here, it undergoes a multi-stage cleaning process before being hand-sorted. The pickling brine is prepared using a proprietary blend of high-quality vinegar, water, salt, and spices, ensuring consistency and flavor depth. We adhere to HACCP principles and conduct regular microbial testing to guarantee product safety and quality.

Processing & Quality Control:

Each vegetable is individually inspected, cleaned, and blanched to achieve optimal texture before being combined. The vegetables are then immersed in our specially formulated vinegar and herb-infused brine. Our facilities are FSSC 22000 certified, and we implement strict quality assurance protocols including pH level monitoring, Brix measurements, and organoleptic evaluations to maintain superior product quality and taste integrity.

Gherkins Specialties

Premium Pickled Gherkins / Cucumbers in Jar

Our premium gherkins are carefully grown and harvested at the ideal size (0–3, 1–4, 3–6, 6–9 cm) and tenderness, then traditionally pickled in our signature vinegar brine with natural spices. This process locks in their natural crunch, tangy flavour, and freshness.

- Hand-Picked premium Gherkins, ensuring uniform size.
- Natural crunch preserved.
- Available in classic dill and spicy variants.
- Brine options: Classic dill, sweet & sour, and bread & butter.
- Hand-sorted for consistent quality.

Jar Options: 370ml, 720ml & 1000ml retail glass Jars.

Packaging Options: 12Jar in a carton and 1910 cartons per 20ft container

Storage Conditions: Store in a cool, dry place. Refrigerate after opening to maintain optimal freshness.

Shelf Life: 24 months unopened from date of production.

Export Specifications: All products meet international food safety standards. Custom labeling and packaging available for export markets (e.g., multilingual labels, specific pallet configurations). Phytosanitary certificates and country-specific documentation provided upon request.
